FAB CONFERENCE REGISTRATION GRANT APPLICATION FORM 2015/16

Feminist Approaches to Bioethics (FAB) is one of the largest and most vibrant bioethics networks in the world today. It has worked since 1992 to create a global community of scholarship, debate, and action around problems in bioethics. FAB promotes scholarship that makes gender central to inquiry in bioethics. It fosters respect within bioethics for differences among people, while critically examining the effects of oppression and disadvantage. FAB hosts, in collaboration with the International Association of Bioethics, a biennial World Congress showcasing original research in bioethics. It supports international networking for feminist scholars at its biennial World Congress, through its listserv, and via its flagship publication, the International Journal of Feminists Approaches to Bioethics (IJFAB). **FAB** is committed to mentoring young scholars and promoting their research through the biennial World Congress and IJFAB.
